

# Solar Schools Programme

Annual report on the rooftop solar installations completed in 240 schools during 2026. The programme is funded jointly by the state and the participating districts.

## 1. Summary

Installed capacity reached 9.6 megawatts across all schools, which is 20 percent more than planned. Electricity bills fell by an average of 61 percent. Three districts finished ahead of schedule and two are still in progress because of monsoon delays.

The main results of the year were:

- 240 schools connected, 40 kilowatts each on average
- 9.6 megawatts of installed capacity
- 61 percent lower electricity bills

## 2. Results by district

Table 1 lists the schools completed and the capacity installed in each district.

| District    | Schools | Capacity (kW) | Bill reduction |
|-------------|---------|---------------|----------------|
| Patna       | 62      | 2,480         | 64%            |
| Gaya        | 48      | 1,920         | 59%            |
| Muzaffarpur | 55      | 2,200         | 62%            |
| Bhagalpur   | 41      | 1,640         | 58%            |
| Darbhanga   | 34      | 1,360         | 60%            |

Table 1: Completed installations by district

### 3. A typical installation

Most schools received panels on the main building. The photo below shows a completed rooftop in Gaya district. Panels are cleaned monthly by the school's maintenance staff, and the inverter is checked every quarter by the district engineer.

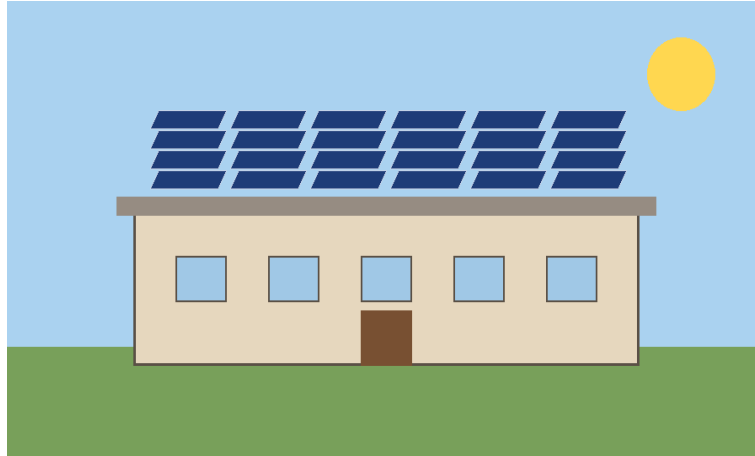

Figure 1: Rooftop panels on a school in Gaya

### 4. Problems found

Two problems appeared during the year. The first was theft of cables at four schools, which was solved by moving the inverters indoors. The second was shading from trees, which reduced output at eleven schools; the trees were trimmed and output recovered within a month. Neither problem is expected to

recur in 2027 because the new installation checklist covers both. The checklist is attached as an appendix.

## **5. Next year**

The programme will add 300 schools in 2027 and start battery storage trials in twenty of them.
